Bucharest, Romania

TheGladja

EDUCATION

Bachelor of Computer Science, Faculty of Mathematics and Computer Science

University of Bucharest

Oct 2020 – July 2024

Course content: Advanced frontend, ASP.NET, Database management systems, Advanced object programming, Web techniques.

High School Diploma. Informatics

"Mihail Kogalniceanu" Highschool, Vaslui

Sept 2016 – June 2020

EXPERIENCE

Database Administrator

B.C.R.

July 2022 – October 2022

Bucharest

Applying code to databases. Managing technical difficulties from the terminal. Inspecting and writing SQL code for specified tasks.

PROJECTS

Charging Companion

January 2023

Github link: [TheGladja/LicenseApp/tree/master](#)

Charging Companion is an Android Studio app that provides information about the charging time of different devices depending on the energy provided by a solar panel that is connected with the app through bluetooth. Technologies such as Java, XML Layouts, Glide, Jsoup, SQLite, Gradle, SharedPreferences.

ASP.NET project that manages an education system

December 2022

Github link: [TheGladja/ASP.NET-PROJECT](#)

Developed with C# and Angular, it is a way to give a more secure and futuristic look to an education system.

JAVA project that manages a library

February 2022 - May 2022

Github link: [TheGladja/ProiectPAO](#)

Built with Java entirely. CSV files were used for data input and output, and mySql for storing the objects into the database.

ABOUT ME

As a college student pursuing a degree in Mathematics and Informatics, with a focus on Informatics, at the University of Bucharest, I am eager to make a valuable contribution as an intern in the field of Computer Science.

SKILLS

C++

C#

Angular

Java

SQL
